LATEST WHITEPAPER

Empowering CRISPR With Innovative Single Cell Isolation

This whitepaper explores the advantages of a novel cell sorting and dispensing platform – which combines microfluidics, flow cytometry and liquid dispensing – that can help researchers get to their optimal clones more efficiently.

Download this FREE [whitepaper](#) now to discover how to:

- Achieve plated single cells in as little as seven minutes
- Preserve cell viability and integrity for better clonal growth
- Save time with a simplified, automated workflow
